

Streamline Supplier Data:
Customized Questionnaires for Easy
Management

CleanChain Assessment Hub

The Assessment Hub provides a streamlined approach to collecting and managing supplier information through customizable questionnaires. It supports various question formats and document uploads, making it versatile for different needs. Brands benefit from efficient data collection, comprehensive reporting, and the ability to ensure compliance with necessary certifications.

A Comprehensive Tool for Supplier Assessments

Customizable Questionnaires:

Tailor your assessments with various question formats, including numerical, text, date fields, and document uploads. Our module supports uploading certificates to bypass answering extensive questions, saving you time and effort.

Multilingual Support:

The pre-designed template allows for text formatting and seamless language integration.

Section Management: Organize questionnaires into different sections for easier navigation and completion. Track progress with a summary of answered questions to ensure nothing is missed.

Efficient Document Handling

Document Uploads:

Users can upload necessary documents directly within the questionnaire, with options to make uploads mandatory or optional. Fields to explain missing documents ensure completeness and compliance.

Secure Storage:

All uploaded documents are stored securely, ensuring data integrity and confidentiality throughout the assessment process.

Robust Reporting and Analysis

Comprehensive Reports:

Download reports summarizing questionnaire completions and uploaded documents, providing a clear overview of supplier compliance and assessment results.

Filterable Reports:

Filter reports by supplier, assessment, and specific questions or answers for detailed insights. Easily identify areas of improvement or compliance issues.

Completion Tracking:

Monitor the progress of questionnaire completion and document uploads in real-time, ensuring timely responses and adherence to deadlines.

User Access and Customization

Tailored Setup:

CleanChain sets up and customizes the module according to client specifications, supporting user-specific actions and amendments within the platform.

Ease of Use:

The platform is designed for efficient data collection and management without requiring advanced technical skills. Intuitive interfaces and user-friendly features enhance the overall experience.

Benefits of the Assessment Hub

Efficiency

Significantly reduces the time and effort required to collect and verify information from multiple suppliers

Comprehensive Reporting

Detailed reports provide valuable insights into the completion status and document submissions.

Customization

Flexible setup options cater to various types of data collection needs.

Ease of Use

The platform is effective for collecting and managing supplier information without requiring advanced technical skills.

Why Choose CleanChain's Assessment Hub?

Enhanced Compliance

Ensure your suppliers meet necessary certifications and compliance standards with ease.

Improved Transparency

Foster transparency within your supply chain by efficiently managing and communicating supplier information.

Cost Savings

Reduce administrative costs associated with manual data collection and verification processes.

Better Decision Making

Leverage comprehensive reports and insights to make informed decisions and drive continuous improvement in your supply chain.
